

# SHAPE-P-053-MR-f

**SHAPE  
Probes**

**SG NDT SHAPE probes** are an ideal solution for examining surfaces with varying curvatures and geometries. They can be held in the hand or in a small probe holder, making them a versatile tool for initial testing and proof of concept verification before transitioning to a rigid probe with a fixed geometry.

**The SHAPE-P-053-MR-f probe is a mid-resolution inspection probe, manufactured with no rubber backing, resulting in the ultimate probe flexibility.** These probes have been field-proven as an excellent “all-rounder”.

The SHAPE probe can be customized to meet specific requirements, making it the ultimate tool for surface Eddy Current Array examination.

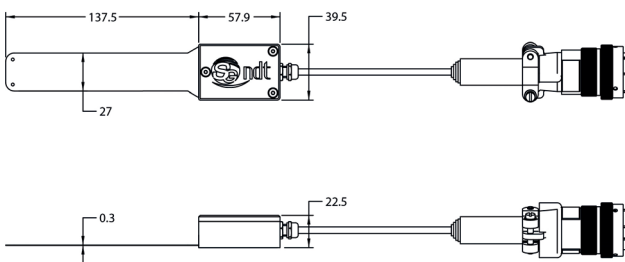

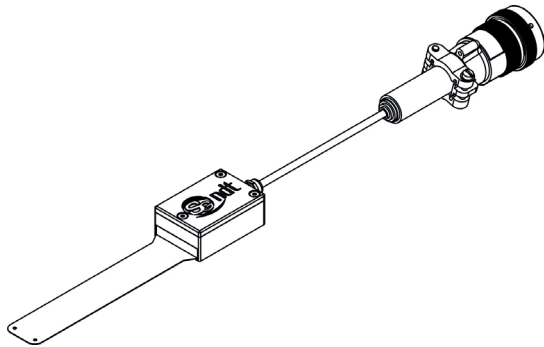

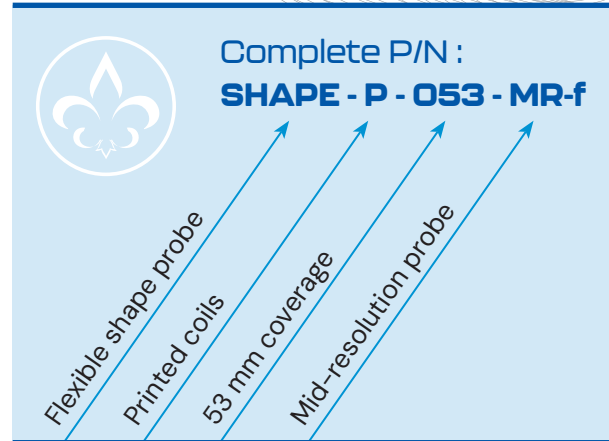

## SHAPE-P-053-MR-f

Technology	PCB Coils
Frequency Range	50kHz – 500kHz
Coil OD	3.5mm
Coil Quantity	2 Rows of 16 (32 total)
Probe Coverage	53mm
Topology	Long Single Driver
Channels	31 Axial, 15 Transverses (total 46)
Resolution	3.5mm Axial, 3.5mm Transverse
Curve Radius	> 20mm
Typical Detectable Defect	> 2mm
Cable Length	3m Standard
Maximum Lift-Off	2.75mm

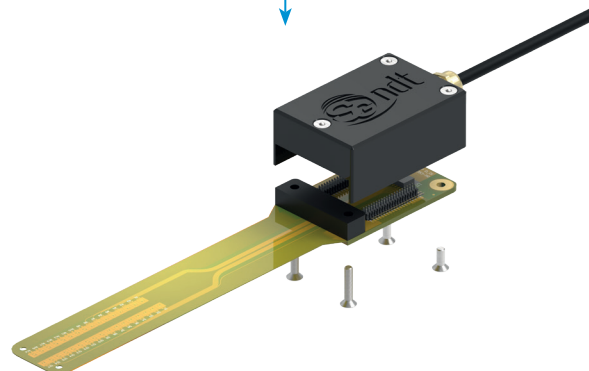

# SHAPE-P-053-MR-f

## Interchangeability

The flexible array is easily detached from the cable and multiplexer (MUX) assembly and replaced using a single tool. This means that the array can be quickly and easily replaced by other similar arrays with a different coverage, resolution or topology.

Cable P/N : **CBLS-SHAPE-03M**

Array P/N : **SFLX-P-053-MR-f**

**Through innovation,**  
we surpass standard expectations
